Employee Earnings and Hours

Australia

NOTES

FORTHCOMING ISSUES

The Survey of Employee Earnings and Hours (EEH) will not be conducted in 1997. The next survey will be conducted in 1998. The preliminary results from this survey are to be published in the May 1998 edition of *Employee Earnings and Hours*. *Preliminary, Australia* (6305.0), expected to be released in November 1998. Final results are to published in the May 1998 edition of this publication, expected to be released in March 1999.

CHANGES IN THIS ISSUE

The format and tables of this issue have been revised as a result of a user review conducted in 1996, and in accordance with changes in ABS publishing standards.

Occupation data for employees in this publication have been classified according to the second edition of the Australian Standard Classification of Occupations (ASCO), except for Table T, which has been classified to ASCO First Edition (see paragraphs 12 and 13 of the Explanatory Notes). For more information regarding the second edition classification see *Information Paper: ASCO — Australian Standard Classification of Occupations* (1221.0).

UNPUBLISHED DATA

In addition to the information contained in this publication, there is a large range of unpublished data available on request from the EEH Survey. These data can be used to produce tables specifically tailored to users' requirements.

INTRODUCTION

This publication presents information on the composition and distribution of the earnings of wage and salary employees in Australia at May 1996, derived from the Survey of Employee Earnings and Hours (EEH).

In the 1996 EEH Survey, both the first and second editions of the Australian Standard Classification of Occupations (ASCO) were used in coding employee occupations. Comments below on occupation estimates refer to the second edition classification.

CATEGORY OF EMPLOYEES

Full-time adult managerial employees had the highest average weekly total earnings (\$917.50) of all employee categories. A relatively high proportion of employees in this category were male (75.1%).

Full-time adult non-managerial employees' average weekly total carnings (\$683.00) was higher than the average for all employees (\$573.70), reflecting the exclusion of lower-earning groups such as junior and part-time employees from this category. Some 62.3% of employees in this category were male. Full-time adult non-managerial employees accounted for almost two-thirds (65.2%) of all male employees and 45.1% of all female employees.

Full-time junior non-managerial employees had lower average weekly total earnings (\$319.70), compared with adult employees, and represented only 3.2% of all employees in the scope of the EEH Survey.

Part-time employees constituted 29.1% of all employees, although this figure was higher among all female employees (45.7%), who accounted for 73.2% of all part-time employees. Their lower average weekly total earnings (\$253.10), compared with full-time employees reflected, in part, their lower average weekly hours paid for.

SUMMARY OF FINDINGS

DISTRIBUTION OF EARNINGS

FULL-TIME ADULT NON-MANAGERIAL EMPLOYEES (TABLES 15, 16 & 28)

For full-time adult non-managerial employees, average weekly total earnings was 683.00, an increase of 4.2% in the year to May 1996. Median weekly total earnings was 625.30, up 4.6% from 598.00 in May 1995.

For these employees, 25% recorded weekly earnings of \$502.60 or less , and 25% recorded earnings of more than \$804.00, compared with \$484.40 and \$769.50 respectively in May 1995. The difference between the 10th and 90th percentiles for average weekly total earnings was \$555.10. The most common of the \$100 earnings ranges for weekly total earnings was \$500 and under \$600.

Sex

Average weekly total earnings was \$729.70 for males (up 4.6% since last year), and \$605.70 for females (up 3.2%). Median weekly total earnings for males was \$671.30, compared with \$568.50 for females — up 5.0% and 3.7% respectively since May 1995.

For male employees, 25% recorded earnings of \$527.90 or less, and 25% recorded earnings of more than \$852.70 — a difference of \$324.80. The corresponding difference was \$239.20 for female employees, where 25% of females recorded earnings of \$473.20 or less and 25% recorded earnings of more than \$712.40.

Industry

Average weekly total earnings ranged from \$575.70 to \$835.40 for major industry groupings, with all groupings recording increases in average weekly total earnings of employees since May 1995. The largest percentage increase was recorded for Government administration and defence (4.8% to \$667.10). Accommodation, cafes and restaurants, Cultural and recreational services and Personal and other services recorded the lowest increase (2.7% to \$625.40).

States and Territories

Increases were recorded in the level of average weekly total earnings across all States and Territories in the year to May 1996. The strongest growth occurred in the Territories, with a 10.4% increase reported in the Northern Territory followed by a 8.3% rise in the Australian Capital Territory. South Australia (2.3%), Tasmania (2.5%), New South Wales (3.9%) and Queensland (4.1%) recorded lower growth than the national average (4.2%).

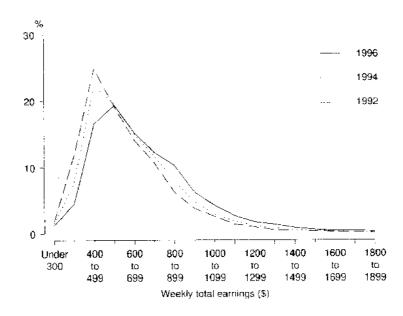

DISTRIBUTION OF EARNINGS continued

FULL-TIME ADULT EMPLOYEES (TABLES 8 & 12)

Average weekly total earnings increased by 5.0% in the year to May 1996, to \$723.90. Median weekly total earnings was \$649.60; compared with \$613.60 last year, an increase of 5.9%.

For full-time adult employees, 25% recorded carnings of more than \$844.20, up from \$805.30 in May 1995. For these employees 25% recorded earnings of \$507.00 or less, compared with \$488.70 last year.

WEEKLY TOTAL EARNINGS, Distribution -- Full-time Adult Employees - May 1992, 1994, 1996

Sex

Average weekly total earnings was \$780.60 for males and \$620.90 for females, up 5.4% and 3.7%, respectively. Median weekly total earnings for males increased by 5.3% to \$701.30 (up from \$666.20), compared with a 4.4% rise for females (from \$552.40 to \$576.80).

For male employees, 25% recorded weekly total earnings of \$538.70 or less, and 25% of female employees recorded earnings of \$471.90 or less.

For male employees, 25% recorded earnings of more than \$915.40, and for female employees 25% were earning more than \$734.50.

Occupation

The highest average weekly total earnings was recorded for Managers and administrators (\$1,129.60) and Professionals (\$862.40), while the two major occupation groups recording the lowest average weekly total earnings were Labourers and related workers (\$556.80) and Elementary clerical, sales and service workers (\$558.00).

For males, weekly total earnings was higher than for females across all major occupation groups. The greatest difference occurred among Intermediate production and transport workers (where average full-time adult female weekly total earnings was 72.0% of the male level) and Tradespersons and related workers (73.0%).

DISTRIBUTION OF EARNINGS continued

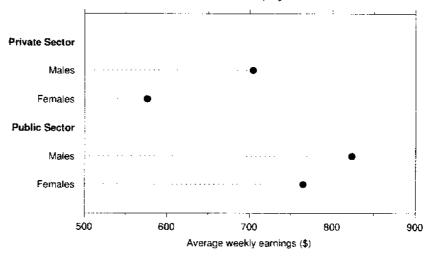

FULL-TIME ADULT EMPLOYEES (TABLES 8 & 12) continued

Sector

Average weekly total earnings recorded for the public sector was higher at \$774.60 than for the private sector (\$702,30).

Public sector employees had higher recorded average weekly total earnings for both males and females (\$823.50 and \$704.40, respectively), compared with private sector employees (\$764.50 and \$576.50, respectively). The difference between public and private sector earnings was greater for females (\$127.90) than for males (\$59.00). In addition, growth in weekly total earnings between 1995 and 1996 for public sector employees exceeded that for the private sector, for both males and females.

AVERAGE WEEKLY EARNINGS, Full-time Adult Employees -- Sector

ALL EMPLOYEES

Average weekly total earnings recorded for May 1996 was \$573.70, up 4.1% from the \$551.00 recorded last year. Median weekly total earnings was \$528.70 compared with \$507.60 in May 1995, an increase of 4.2%.

For all employees, 25% recorded weekly total earnings of more than \$751.40 and 25% recorded weekly total earnings of \$342.40 or less. This compares with \$337.50 and \$714.50 respectively last year.

Sex

Average weekly total earnings for male employees rose 4.6% to \$684.30 in May 1996. In comparison, the level for female employees was \$447.20, after a year-to-year growth of 3.0%. The earnings for female employees represents 65.4% of the earnings of male employees. Median weekly total earnings for males was \$630.00, compared with \$434.20 for females.

DISTRIBUTION OF EARNINGS continued

ALL EMPLOYEES continued

Occupation

Highest average weekly total earnings was recorded for Managers and administrators (\$1,104.10) and Professionals (\$753.60), while the two major occupation groups recording the lowest average weekly total earnings were Elementary clerical, sales and service workers (\$314.30) and Labourers and related workers (\$398.50). Part of the magnitude of the variations in these earnings levels for different occupations is explained by the different proportions of part-time and junior employees represented in these occupation groups.

The spread of income was substantially different among occupation groups. Managers and administrators earned \$2,000 or more in 5.5% of cases. The most common of the \$100 weekly total earnings ranges for Elementary clerical, sales and service workers was under \$100. This reflects the high proportion of junior and part-time employees in this occupation group. Weekly total earnings at the 25th percentile ranged from \$117.10 for Elementary clerical, sales and service workers to \$806.70 for Managers and administrators — a difference of \$689.60.

PART-TIME EMPLOYEES (TABLES 2 TO 7 & 14)

Sex

Average weekly total earnings for part-time employees was \$253.10, with average weekly total earnings being lower for males in this group than for females (\$234.30 compared with \$260.00).

Occupation

Female part-time employees had higher average weekly total earnings than males across most occupation groups (the greatest difference, of \$111.50, was in the Associate professionals group).

States and Territories

Among the States and Territories, weekly total earnings were generally comparable for part-time employees. Employees in the Australian Capital Territory had the highest earnings (\$273.50), while those in Western Australia had the lowest (\$238.10).

Sector

The average weekly total earnings for part-time employees in the private sector (\$233.40) was 69.1% of the earnings level for public sector employees (\$338.00).

COMPOSITION OF EARNINGS

BASE PAY

In May 1996, average weekly base pay for all employees was \$533.50, up 4.6% (or \$23.40) since May 1995. All categories of employees recorded an increase in average weekly base pay in the year to May 1996. Among full-time adult employees, both managerial and non-managerial employees recorded a growth in base pay of 4.4%. The percentage increase was stronger among part-time employees (5.1%) — however, their average total hours paid for remained unchanged (17.0 hours).

Across all employees, base pay constituted, on average, 93.0% of average weekly total earnings. Average weekly base pay constituted a higher proportion of average weekly total earnings for full-time managerial adult employees (98.5%) and part-time employees (97.8%), reflecting lower overaward, over agreement and overtime pay.

COMPOSITION OF EARNINGS continued

BASE PAY continued

Sex

Both male and female employees recorded increases in average weekly base pay since May 1995 (to \$620.00 and \$434.60 respectively), with male employees showing stronger growth (5.3%), when compared with females (3.3%).

Among male employees, full-time adult managerial employees recorded the highest increase in average weekly base pay in absolute terms (\$48.60), while the highest percentage increase was recorded among full-time employees (5.9% or \$38.60), in the year to May 1996. Among female employees, the highest absolute increase in average weekly base pay was recorded for full-time adult employees (\$23.00), while the highest percentage increase occurred among part-time employees (5.3% or \$12.80).

Base pay constituted a smaller proportion of average weekly total earnings of male employees (90.6%), than for female employees (97.2%), which reflects lower overaward and overagreement pay, payment by measured result, and overtime pay among female employees.

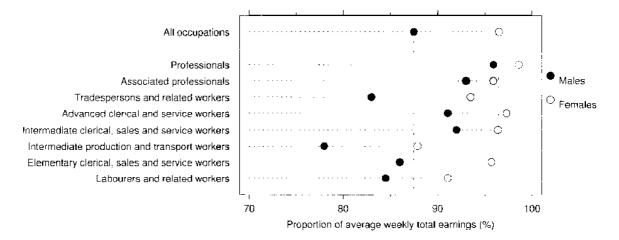

Occupation

In May 1996, the average weekly base pay of full-time adult non-managerial employees, ranged from \$479.70 for Labourers and related workers to \$819.00 for Professionals — a difference of \$359.30.

Professionals recorded the highest average weekly base pay for both male and female full-time adult non-managerial employees (\$871.10 and \$762.80 respectively), while Labourers and related workers recorded the lowest (\$492.90 and \$445.50 respectively).

The occupation group for which average weekly base pay constituted the highest proportion of average weekly total earnings among full-time adult non-managerial employees was Professionals (96.2%), while base pay constituted the lowest proportion of average weekly total earnings among Intermediate production and transport workers (78.8%).

BASE PAY, Full-time Adult Non-managerial Employees—Occupation

Industry

Mining was the industry group which had the highest average weekly base pay in May 1996 for full-time adult non-managerial employees (\$903.10), while Retail trade recorded the lowest (\$471.30).

For full-time adult non-managerial employees, an increase in average weekly base pay was recorded across all industry groups in the year to May 1996. This increase ranged from 1.3% for Cultural and recreational services to 8.2% for Mining. For these employees, average weekly base pay constituted between 78.3% (Mining) and 99.2% (Education) of average weekly total earnings.

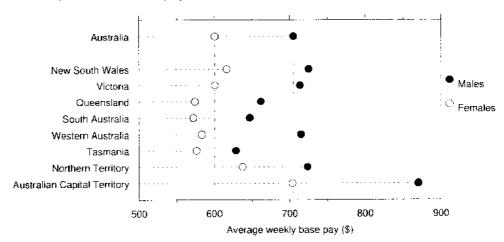

COMPOSITION OF EARNINGS continued

BASE PAY continued

States and Territories

In the year to May 1996, all States and Territories recorded growth in average weekly base pay of full-time adult employees. This increase ranged from 1.6% (or \$9.90) in Tasmania to 8.4% (or \$53.40) in the Northern Territory. In absolute terms, the Australian Capital Territory recorded the largest increase in average weekly base pay for full-time adult employees (\$55.60 or 7.5%). For full-time adult employees, the Australian Capital Territory recorded the highest average weekly base pay (\$801.60), while Tasmania recorded the lowest (\$611.80).

BASE PAY, Full-time Adult Employees—States & Territories

Sector

In May 1996, average weekly base pay was higher for full-time adult employees in the public sector (\$7.41.00), compared with full-time adult employees in the private sector (\$636.60). Average weekly base pay comprised 95.7% of average weekly total earnings for full-time adult employees in the public sector, compared with 90.6% for those in the private sector.

OVERTIME

Around one quarter of full-time adult non-managerial employees received overtime pay in the May 1996 reference week. The average weekly overtime earnings of full-time adult non-managerial employees receiving overtime increased by 4.0% to \$189.30, in the year to May 1996. However, the average overtime hours paid for remained the same (7.7 hours).

Sex

In May 1996, the average weekly overtime earnings of male full-time adult non-managerial employees receiving overtime was higher than that of females (\$207.20, compared with \$113.40). However, the increase between 1995 and 1996 in the average weekly overtime earnings of males (3.0% or \$6.10) was smaller than that of females (8.5% or \$8.90).

Among full-time adult non-managerial employees who worked overtime, males were paid, on average, for 8.5 hours. This was similar to the average weekly overtime hours paid for in 1995 (8.4 hours). For females, average weekly overtime hours paid for was 4.9 hours, which was also similar to the previous year (4.8 hours).

COMPOSITION OF EARNINGS continued

| OVE | ERT | IME | continued |
|-------|------|-----|------------|
| 11111 | - 14 | ⊓W⊩ | -continued |

Industry

Occupation Among full-time adult non-managerial employees who worked overtime, Advanced clerical and

service workers had both the lowest average weekly overtime earnings and hours (\$110.60 and

4.4 hours)

Professionals recorded the highest paid overtime earnings (\$230.70), for which they worked an average of 6.9 hours, while Intermediate production and transport workers recorded the

highest overtime hours (9.8 hours), receiving average weekly overtime pay of \$229.30.

For full-time adult non-managerial employees working overtime, those in the Construction industry had the highest average overtime hours (11.3 hours), while those in Finance and insurance worked the lowest overtime hours (4.4 hours), of all the major industry groups. However, in terms of overtime earnings for full-time adult non-managerial employees, the Mining industry recorded the highest average overtime earnings (\$323.10), for which they worked, on average, 10.6 hours. Employees in the Accommodation, cafes and restaurants

Among full-time adult non-managerial employees working overtime, the largest absolute increase in average weekly overtime earnings since May 1995 occurred in the Education inclustry (\$49.40), while the largest decrease was recorded in the Construction industry (\$9.30).

States and Territories Full-time adult non-managerial employees in the Northern Territory recorded the highest

industry had the lowest average overtime earnings (\$95.00).

average paid overtime hours and earnings (9.7 hours and \$2±4.80) for those employees who worked overtime. The lowest average overtime hours were recorded in the Australian Capital Territory (6.0 hours), for which they earned \$156.40, while the lowest average overtime

earnings were recorded in South Australia (\$140.30 for an average of 6.1 hours worked).

Sector In May 1996, private sector full-time adult non-managerial employees who worked overtime, worked more overtime hours, on average (8.1 hours for which they received \$194.30), than

their public sector counterparts who worked 6.3 hours of overtime and received \$174.90.

Average overtime hours recorded in May 1996 for both private and public sector full-time adult non-managerial employees were similar to 1995. The average overtime earnings of public sector full-time adult non-managerial employees working overtime increased by 7.4% (or \$12.00) in the year to May 1996, compared with 2.9% (or \$5.50) for private sector employees.

OVERAWARD AND OVERAGREEMENT PAY

Sex

For all employees, average weekly overaward and overagreement pay decreased by 23.7% (\$1.40) to \$4.50 in the year to May 1996. For full-time adult non-managerial employees the decrease was similar, at 21.2% (\$1.80), taking average overaward and overagreement pay to \$6.70. The proportion of full-time adult non-managerial employees receiving overaward and

overagreement pay decreased from 10.5% in May 1995 to 8.1% in May 1996.

Average overaward and overagreement pay for full-time adult non-managerial male employees

was over twice that received by female employees (\$8,30 and \$4.00 respectively).

Occupation Among the major occupation groups, Tradespersons and related workers had the highest

average overaward and overagreement pay for full-time adult non-managerial employees (\$14.00), while Elementary clerical, sales and service workers had the lowest (\$2.40).

Sector Average overaward and overagreement pay for full-time adult non-managerial employees was

much higher in the private sector than the public sector (\$9.70 compared with \$0.60).

ABS - EMPLOYEE EARNINGS AND HOURS - 6306.0 - MAY 1996 11

COMPOSITION OF HOURS

For full-time adult non-managerial employees, average weekly total hours paid for was 39.8 hours — similar to May 1995 (39.9 hours). In both years this was made up of 37.9 hours of ordinary time, and 2.0 hours of paid overtime.

Sex

Average weekly total hours for full-time adult non-managerial male employees (40.8 hours) was higher than those for females (38.2 hours).

Full-time adult non-managerial female employees had lower average weekly ordinary time and overtime hours paid for (37.5 hours and 0.6 hours, respectively), compared with full-time adult non-managerial male employees (38.1 hours and 2.8 hours respectively).

Occupation

Advanced clerical, sales and service workers had the lowest recorded average weekly ordinary time hours paid for (37.1 hours) of all the major occupation groups. They also had the lowest average weekly total hours (37.4 hours) and the lowest average weekly overtime hours (0.4 hours).

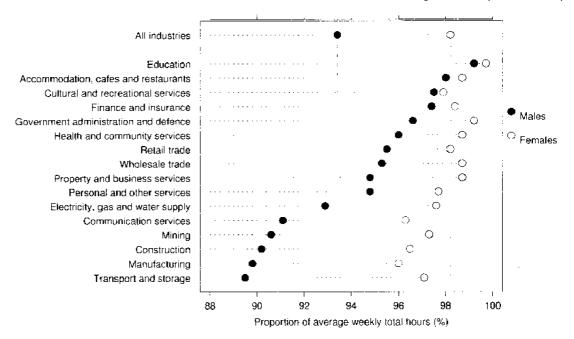

Intermediate production and transport workers had the highest average weekly total hours paid for (43.4 hours) which was reflected by both high ordinary and overtime hours paid for (38.5 hours and 4.8 hours respectively).

Industry

Full-time adult non-managerial employees in the Education industry had the lowest recorded average weekly total hours paid for (36.7 hours) of all the major industry groups. This group also had the lowest average weekly ordinary time hours (36.5 hours) and the lowest average weekly overtime hours (0.2 hours).

Full-time adult non-managerial employees in the Mining industry had both the highest average weekly total hours paid for (44.2 hours) and the highest average weekly ordinary time hours paid for (40.3 hours) of all the major industry groups.

AVERAGE WEEKLY ORDINARY TIME HOURS, Full-time Adult Non-managerial Employees-Industry

SUMMARY OF FINDINGS

COMPOSITION OF HOURS continued

Sector

Among full-time adult non-managerial employees, higher average weekly total hours paid for were recorded in the private sector (40.5 hours) than in the public sector (38.4 hours). This was also the case for average weekly ordinary time hours paid for (38.2 hours and 37.1 hours respectively).

States and Territories

Full-time adult non-managerial employees in Western Australia had the highest recorded average weekly total hours paid for (40.7 hours) and ordinary time hours paid for (38.6 hours) of all States and Territories. Lowest average weekly total hours were recorded in the Australian Capital Territory (38.2 hours), which also had the lowest average weekly ordinary time hours (37.3 hours). Full-time adult non-managerial employees in the Northern Territory recorded the highest overtime hours paid for (2.6 hours).

INTRODUCTION

SCOPE

- **1** This publication contains estimates obtained from a sample survey of employers conducted in May 1996. The survey is designed to provide statistics on the distribution of employees according to weekly earnings and hours paid for, and on the composition of average weekly earnings and hours for various categories of employees and principal occupations.
- **2** Preliminary estimates were published in *Employee Earnings and Hours*, *Preliminary*. *Australia*, *May 1996* (6305.0), released on 9 December 1996.
- **3** All wage and salary earners who received pay for the reference period are represented in the survey, except:
 - members of the Australian permanent defence forces;
 - employees of businesses primarily engaged in agriculture, forestry and fishing;
 - employees in private households employing staff;
 - employees of overseas embassies, consulates, etc;
 - · employees based outside Australia; and
 - employees on workers' compensation who are not paid through the payroll.
- **4** Also excluded are the following persons who are not regarded as employees for the purposes of this survey:
 - directors who are not paid a salary;
 - proprietors/partners of unincorporated businesses; and
 - self-employed persons such as subcontractors, owner/drivers, consultants and persons paid solely by commission without a retainer.

SURVEY DESIGN

- **5** A sample of approximately 9,000 employers was selected from the Australian Bureau of Statistics (ABS) register of businesses to ensure adequate State and industry representation. The statistical unit for the survey comprises all activities of an employer in a particular State or Territory. Each statistical unit is classified to an industry which reflects the predominant activity of the business in the State or Territory. In a small number of cases where a business has significant employment in more than one industry, a separate statistical unit is created for each industry. The statistical units are stratified by State, public/private sector, industry and size of employment, and a simple random sample is selected from each stratum.
- **6** Employers with fewer than 10 employees are required to complete details for every employee, while those with 10 or more employees are required to select a random sample of their employees in accordance with instructions supplied by the ABS. Data for approximately 73,000 employees were obtained in the survey.
- 7 Although the sample is not designed specifically to provide estimates of numbers of employees, it is estimated that 3,254,200 male and 2,846,100 female employees are within the scope of the survey. These and other estimates of numbers of employees included in this publication should not be taken as measures of total employment in the categories indicated.

INDUSTRY CLASSIFICATION

8 From May 1994, industry data from the Employee Earnings and Hours (EEH) Survey have been classified according to the Australian and New Zealand Standard Industrial Classification (ANZSIC), a detailed description of which appears in Australian and New Zealand Standard Industrial Classification, 1993, (1292.0). The ANZSIC replaces the Australian Standard Industrial Classification (ASIC) previously used to classify industry data.

- **9** The ANZSIC was developed by the ABS and Statistics New Zealand for use in the production and analysis of industry statistics in both countries. ANZSIC is a classification which serves to identify groupings of businesses which carry out similar economic activities and which satisfy other conditions (like economic significance). These groups can be used to define an industry. An individual business can then be assigned to an industry on the basis of it's predominant economic activity.
- **10** Employees selected in the EEH Survey are classified to the industry of the business in which they are employed (see paragraph 5 above).
- 11 The ANZSIC has a structure consisting of categories at four levels:
 - Division (the broadest level as used in this publication);
 - Subdivision;
 - Group; and
 - Class.

OCCUPATION

- 12 From May 1996, EEH occupation data are classified according to the Australian Standard Classification of Occupations (ASCO) Second Edition, a detailed description of which appears in *Information Paper: ASCO—Australian Standard Classification of Occupations* (1221.0). The new version of the classification replaces ASCO First Edition, which was adopted in the survey in May 1986. Like ASCO First Edition, ASCO Second Edition is a skills-based classification of occupation. However, the structure of ASCO Second Edition comprises five hierarchial levels (Major Group, Sub-major Group, Minor Group, Unit Group and Occupation) compared with four levels in ASCO First Edition (Major Group, Minor Group, Unit Group and Occupation). EEH data are coded to the unit group level. as was the practice under ASCO First Edition. For May 1996, to allow comparisons, occupation data classified to ASCO First Edition are also available.
- **13** Care should be taken when comparing survey estimates based on ASCO groups with estimates based on the managerial/non-managerial status of employees, which is determined and reported by the employer. Estimates for employees with manager status include employees classified to ASCO categories other than the ASCO major group 'Managers and administrators'; e.g. employees classified as 'Professionals' according to ASCO may be categorised by employers as having managerial status. Conversely, tables in this publication which contain estimates for non-managerial employees (as defined by employers) will include some employees who would be classified to the ASCO major group 'Managers and administrators'.

COMPARABILITY OF RESULTS

14 A new sample design was implemented in 1995, primarily to accommodate the full introduction of the new industry classification ANZSIC (see paragraphs 8–11 above). Prior to 1995, industry estimates were compiled from a sample design where the sample stratification was based on ASIC. ANZSIC-based industry level estimates compiled from 1995 onwards are more reliable than those produced for 1994 and care should be exercised in comparing 1994 ANZSIC-based estimates with those for later years. The new sample design also contains improvements enabling more reliable estimates of the total number of employees to be produced (see paragraph 7 above).

- 15 Care should be taken when comparing the results of this survey with the quarterly series *Average Weekly Earnings, States and Australia* (6302.0), as a different sample design and survey methodology are used. The Average Weekly Earnings (AWE) Survey collects information relating to total employment of organisations selected in the survey, whereas results from the EEH Survey are obtained in relation to a sample of employees within the organisations selected. In addition, the size of the sample for the EEH Survey is much larger than that for the AWE.
- **16** Because of the two-stage sampling methodology used for this survey to arrive at a sample of employees, it is not possible to ensure that the representation of all the sub-groups of interest in the sample accurately reflect their representation in the population.
- **17** Considerable care is taken in questionnaire design and in the instructions given to employers on how to select samples of their employees. All survey returns are subjected to careful editing to detect reporting errors, inconsistencies and transcription errors. Ultimately, however, the quality of survey results depends on the quality of the information provided by survey respondents and adherence to specified procedures.
- **18** From the May 1993 survey, payments resulting from workplace and enterprise bargaining agreements have been included in 'Base pay'. Similarly, some payments previously defined as 'Overaward pay' may have been absorbed into the new 'Base pay' now paid under a workplace/enterprise agreement. Identifiable 'Payments by measured result' and 'Overtime paid' in accordance with a workplace/enterprise agreement continue to be recorded separately.
- **19** For information on the reliability of estimates see the **Technical Notes**.
- **20** Users may also wish to refer to the following publications which are available on request:

RELIABILITY OF ESTIMATES

RELATED PUBLICATIONS

EXPLANATORY NOTES continued

21 Current publications produced by the ABS are listed in the *Catalogue of Publications and Products.* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists publications to be released in the next few days. The catalogue and release advice are available from any **ABS** office.

UNPUBLISHED STATISTICS

22 In most cases, the ABS can also make available information which is not published. This information may be made available in one or more of the following forms: microfiche, photocopy, data tape, floppy disk, CD-ROM, computer printout or clerically extracted tabulation. Generally a charge is made for providing unpublished information. Inquiries should be made to the Labour Statistics Centre Output Group on Perth (09) 360-5305 or to Information Services in the nearest ABS office. Details of additional data available from this survey are shown at the end of the publication.

ROUNDING

- **23** Estimates of earnings shown in the tables are rounded to the nearest 10 cents, and those of average weekly hours paid for are rounded to the first decimal place.
- **24** Where figures have been rounded, discrepancies may occur between sums of the component items and totals.

SYMBOLS AND OTHER USAGES

- n.p. not publishable.
- * subject to high relative standard error. See paragraph 13 of the Technical Notes.
- · · not applicable.

TECHNICAL NOTES

INTRODUCTION

1 As the estimates in this publication are based on information relating to a sample of employers and employees, rather than a full enumeration, they are subject to sampling variability. That is, they may differ from the estimates that would have been produced if the information had been obtained from all employers and all employees. This difference, called *sampling error*, should not be confused with inaccuracy that may occur because of the imperfections in reporting by respondents or in processing by the ABS. Such inaccuracy is referred to as *non-sampling error* and may occur in any enumeration whether it be a full count or a sample. Efforts have been made to reduce non-sampling error by careful design of questionnaires, detailed checking of returns and quality control of processing.

RELIABILITY OF ESTIMATES

- **2** The sampling error associated with any estimate can be estimated from the sample results. One measure of sampling error is given by the *standard error*, which indicates the degree to which an estimate may vary from the value that would have been obtained from a full enumeration (the 'true' figure). There are about two chances in three that a sample estimate differs from the true value by less than one standard error, and about 19 chances in 20 that the difference will be less than two standard errors.
- **3** Another measure of the sampling error is the *relative standard error*, which is obtained by expressing the standard error as a percentage of the estimate to which it refers. The relative standard error is a useful measure in that it provides an immediate indication of the percentage errors likely to have occurred due to sampling, and thus avoids the need to refer also to the size of the estimate. As it is not practicable to include the standard errors of all estimates in this publication, the tables A to G on pages 66 to 73 have been produced to give an indication of the magnitude of relative standard errors.
- 4 The figures in table A provide an indication of the magnitude of the standard error of estimates of numbers of employees (distribution of weekly earnings) shown in table 1. An example of the use of table A is as follows: the estimate for all male employees in the earnings range \$600 to \$700 is 12.6% of the total number of male employees (see table 1). This represents approximately 410,000 males. Table A shows the relative standard error of this estimate lies between 3.6% and 3.3% (i.e. approximately 3.6%) or 14,760 employees. There are about two chances in three that a complete collection would give a figure within the range 395,240 to 424,760 and about 19 chances in 20 that the figure would be within the range 380,480 to 439,520.
- **5** Table B indicates the relative standard error of estimates of averages (composition of average weekly earnings and hours) for full-time adult non-managerial employees. An example of the use of table B is as follows. Table 2 shows average overtime earnings of full-time adult non-managerial males to be \$69.30. Table B shows the approximate relative standard error for this estimate to be 3.0% (i.e. approximately \$2.10). There are about two chances in three that a complete collection would give a figure within the range \$67.20 to \$71.40 and about 19 chances in 20 that the figure would be within the range of \$65.10 to \$73.50.
- **6** Tables C, D, E and F indicate the relative standard error of estimates of average weekly total earnings for various categories of employees by occupation, industry, sector and State and Territory, respectively. The use of the relative standard error from these tables can be applied in the same way as in the example for table B above.

7 Relative standard errors can be converted to estimates of actual standard errors using the survey estimate and it's associated relative standard error percent in the following manner:

$$SE(\mathbf{x}) = \mathbf{x} * RSE\%(\mathbf{x}) / 100$$

For example, from table 4, the average weekly total earnings for male employees in retail trade is \$431.80, and for female employees it is \$279.00. Table D shows an estimate for the relative standard error on the male estimate is 3.5%, and an estimate of the relative standard error on the female estimate is 2.0%. Applying the above SE(x) formula yields:

8 The difference between two survey estimates is also an estimate and it is therefore subject to sampling variability. The standard error of the difference between two survey estimates depends on the standard errors of the original estimates and on the relationship (correlation) between these two estimates. An approximate standard error or the difference between two survey estimates (x-y) may be obtained by the following formula:

$$SE(x-y) = sqrt(SE(x)^2 + SE(y)^2)$$

- **9** This formula will overestimate the standard error where there is a positive correlation between the two estimates (e.g. male school teachers and female school teachers). While this formula will only be accurate where there is no correlation between the two estimates (e.g. estimates from different States), it is expected to provide a reasonable approximation for the differences likely to be of interest.
- **10** Continuing the previous example of employees in retail trade (above), an estimate of the difference between the earnings of male and female employees is \$131.50. The estimate of the standard error of the difference between the average weekly total earnings for male and female employees in retail trade is:

SE(\$431.80 - \$279.00) =
$$sqrt((\$15.10)^2 + (\$5.60)^2)$$

= \$16.10

- **11** The estimated standard error of \$16.10 represents a relative standard error of 10.5%. There are about two chances in three that the true figure lies in the range \$136.70 to \$168.90, and about 19 chances in 20 that the figure is in the range \$120.60 to \$185.00.
- 12 While the formula above can be used to estimate the standard error on a difference between estimated averages from one year to the next, the EEH Survey is not specifically designed to measure annual movements. To do so would require a high proportion of employees selected in the survey for both years. While there is a fair proportion of common employers, there are very few employees selected in both the 1995 and 1996 survey. Comparisons of this nature should therefore be made with caution (especially of estimates relating to occupation). When estimating the standard error of a movement between two years, the movement standard error will be approximately 1.5 times the standard error on the level estimate, if the standard errors on the two level estimates are similar.
- **13** An asterisk appears against estimates in the publications where the sampling variability is considered too high for most practical uses. Generally, this indicates a relative standard error equal to or greater that 25% of the estimate.

ADDITIONAL DATA AVAILABLE ON REQUEST

INTRODUCTION

A large range of unpublished data are available from the Survey of Employee Earnings and Hours on request. This data can be produced for clients as customised reports. The populations and variables are listed below.

HOW TO PLACE AN ORDER

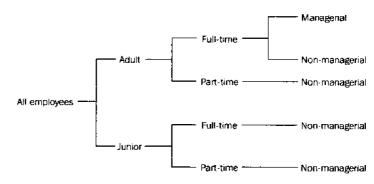

Firstly, determine the population and the variables (see following) that you require estimates for. A covering letter indicating these requirements and the intended uses of the data requested should be addressed to:

Labour Statistics Centre Output Group Australian Bureau of Statistics GPO Box K881 PERTH WA 6001

CONTACT OFFICER

If you wish to discuss individual requests, especially in regard to the reliability of estimates for particular cross-classifications, and the charges involved, please phone the Labour Statistics Centre Output Group on Perth (09) 360 5305 or send a request by facsimile to (09) 360 5954.

POPULATIONS

VARIABLES

The following variables are available from this survey (subject to the reliability of the estimates).

Note: The more variables included in any one tabulation the more likely it is that confidentiality provisions associated with the data will be invoked and some data suppressed.

Distribution of employees by

levels of:

Adult employees

Adult employees are those employees who are 21 years of age or over and employees under 21 who are paid at the full adult rate for their occupation.

Average (mean) earnings or

hours

Average (mean) earnings or hours refers to the amount obtained by dividing the total earnings or hours of a group (e.g. full-time employees) by the number of employees in that group.

Base pay

Base pay refers to the award pay or agreed rate of pay for ordinary time hours paid for. It includes hase pay from workplace agreements and enterprise bargaining awards and agreements. For employees covered by an award or workplace/enterprise agreement it includes all allowances (dirt. height, tool, etc.) and penalty payments (e.g. shift loadings) specified in the award or agreement. It excludes overaward and overagreement pay and service increments not specified in the award or agreement. For employees not covered by an award or agreement, base pay is the agreed wage for ordinary time hours paid for.

Employees

Employees refers to all wage and salary earners (as described in paragraphs 3 and 4 of the Explanatory Notes) who received pay for any part of the reference period.

Full-time employees

Permanent, temporary and casual employees who normally work the agreed or award hours for a full-time employee in their occupation and who received pay for any part of the reference period. If agreed or award hours do not apply, employees are regarded as full-time if they ordinarily work 35 hours or more per week.

Industry

Industry is classified according to the Australian and New Zealand Standard Industrial Classification 1993 (see paragraphs 3 and 8–11 of the Explanatory Notes).

Junior employees

Junior employees are those employees who are under 21 years of age and are not paid at the adult rate for their occupation.

Managerial employees

Managerial employees are managerial, executive and senior professional staff. Generally defined as those employees who are in charge of a significant number of employees or have significant responsibilities in the conduct or operations of the organisation and may not receive payment for overtime. Includes professionally qualified staff who primarily perform managerial tasks in conjunction with utilising their professional skills. Working proprietors and working directors of own incorporated businesses have been included as managerial employees.

Median earnings or hours

Median earnings or hours refers to the amount of earnings or hours which divides the distribution into two groups with equal numbers of employees, one half having earnings or hours below the median and the other half having earnings or hours above the median.

Non-managerial employees

Non-managerial employees are those who are not managerial employees as defined. Non-managerial includes supervisors, clerical staff, tradespersons, non-managerial professionals, apprentices, trainees and cadets.

Occupation

Occupation is classified according to the Australian Standard Classification of Occupations (ASCO) (see paragraphs 12 and 13 of the Explanatory Notes).

Ordinary time hours paid for

Ordinary time hours paid for refers to employees' award, standard or agreed hours of work paid for at the ordinary rate. It includes stand-by or reporting time which are part of standard hours of work, and that part of annual leave, paid sick leave and long service leave taken during the reference period. (Note: Hours paid for was not collected for managerial employees.)

Overaward and overagreement pay

Overaward and overagreement pay refers to amounts of ordinary time pay (regular or otherwise) that are over the award or in excess of amounts specified in workplace/enterprise agreements (e.g. attendance, good time-keeping, profit-sharing, etc.). It excludes payments in the form of a reimbursement for expenses incurred whilst carrying out the employer's business (e.g. payments from petty cash).

Overtime hours paid for

Overtime hours paid for refers to hours in excess of award, standard or agreed hours of work paid for and reported as overtime hours.

Part-time employees

Permanent, temporary and casual employees who are not classified as full-time as defined.

Payment by measured result

Payment by measured result refers to earnings which vary according to measured performance (e.g. piecework, production and task bonuses and commission).

Percentiles

Percentiles refer to any of a hundred divisions of an earnings or hours distribution. For example:

- 25% of employees earn less than or equal to the 25th percentile; and.
- 75% of employees earn less than or equal to the 75th percentile

Reference period

Reference period for the survey refers to the last pay period ending on or before 17 May 1996. Where a pay period is fortnightly or monthly, etc., the employer is requested to report only one week's proportion.

Sector

Public sector includes local government authorities and all government departments, agencies and authorities created by, or reporting to, the Commonwealth Parliament and State Parliaments. All remaining employees are classified as private sector.

Temporary/casual employees

Temporary/casual employees refers to those employed usually on a short term basis and/or who receive a higher rate of pay to compensate for a lack of permanency entitlements.

Weekly ordinary time earnings

Weekly ordinary time earnings of employees refers to one week's earnings for the reference period attributable to award, standard or agreed hours of work. It is calculated before taxation and any other deductions (e.g. superannuation, board and lodging) have been made. Included in ordinary time earnings are award and workplace and enterprise bargaining payments and other agreed base rates of pay, overaward and overagreement payments, penalty payments, shift and other allowances, commissions and retainers, bonuses and similar payments related to the reference period, payments under incentive or piecework, payments under profit-sharing schemes normally paid each pay period, payments for leave taken during the reference period, workers' compensation payments made through the payroll, and salary payments made to directors. Excluded are overtime payments, retrospective pay, pay in advance, leave loadings, severance pay, termination and redundancy payments, payments under salary packaging attracting Fringe Benefit tax and other payments not related to the reference period.

Weekly overtime earnings Weekly overtime earnings of employees refers to payment for hours in excess of award, standard or agreed hours of work which has been reported as overtime

pay.

Weekly total earnings — Weekly total earnings of employees is equal to weekly ordinary time earnings plus

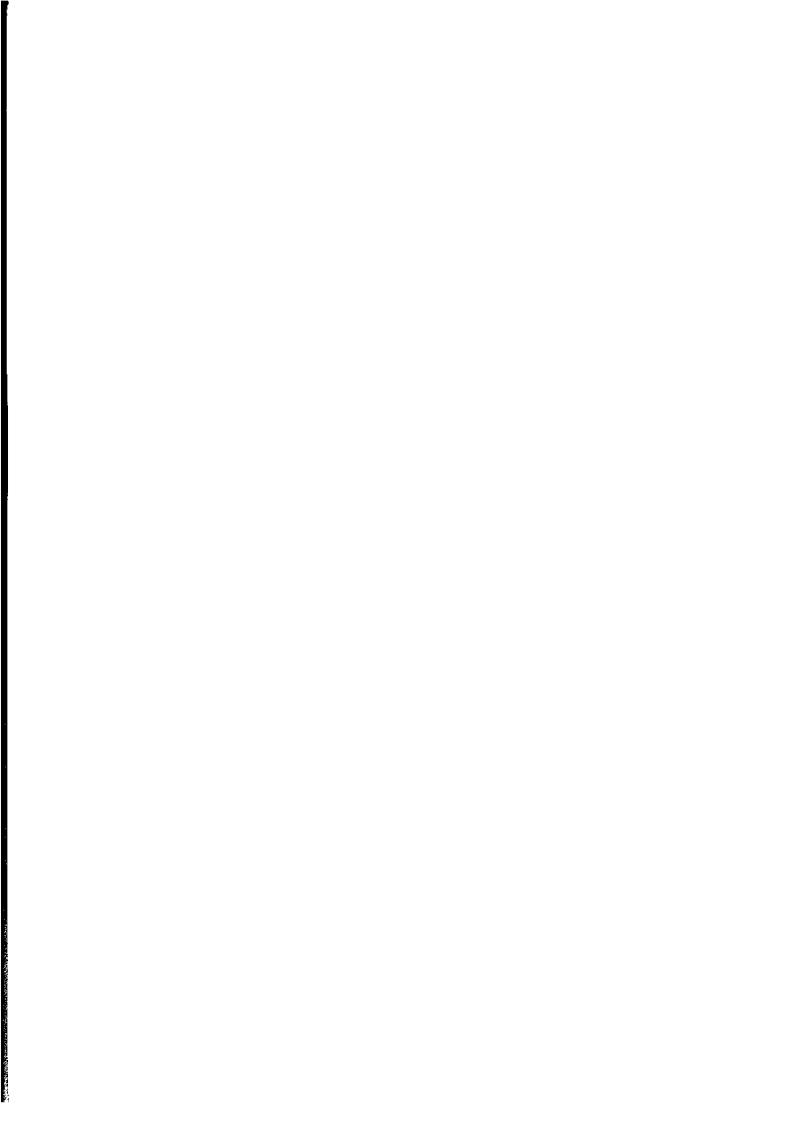

weekly overtime earnings.

Weekly total hours paid for Weekly total hours paid for refers to the hours for which payment was made. It

comprises ordinary time hours and paid overtime hours. For employees paid other than weekly, hours were converted to a weekly basis. For employees who began or ceased work, or were absent without pay for any reason during the reference period, only the hours actually paid for were included. (Note: Hours of

work were not collected for managerial employees.)
