EXPLANATORY NOTES

This bulletin contains summary statistics of university students, staff and finance. The statistics are derived from information supplied by the universities and reflect the situation at the dates, or for the periods, indicated below. They will be superseded by bulletins to be published in due course, showing more detailed and, in some cases, later figures.

2. Following a review of university statistics in 1967, some revisions of concepts, relating mainly to student enrolment statistics, were introduced with effect from 1968. The principal changes, in so far as they affect the statistics presented in this bulletin, are explained in the following paragraphs.

3. In Tables 6 and 8, summary student and staff figures are shown, not only for each university, but also for branches. The following have been classified as separate branches:

University of New South Wales -  
Wollongong University College;  
Robinson College, Broken Hill;  
Royal Military College, Duntroon;  
Royal Australian Naval College, Jervis Bay.

University of Queensland -  
University College of Townsville.

Australian National University -  
Institute of Advanced Studies;  
School of General Studies.

A full degree course is now provided at the Royal Military College, Duntroon. Since the College was first affiliated with the University of New South Wales in 1968, only first and second year cadets were enrolled for degree courses in 1969. Only first year university subjects are taken at the Royal Australian Naval College, Jervis Bay. The subjects, when passed, are accredited towards a degree of the University of New South Wales. The R.A.A.F. Academy, Point Cook, Victoria, is affiliated with the University of Melbourne, and separate statistics are not shown, as the Academy is not classified as a separate branch.

Student statistics

4. The statistics in Table 1 to 6 refer to enrolments for 1969 up to the end of March. Students enrolled for more than one course are counted for each course. The universities were asked to adjust enrolments so that students enrolled in more than one course would be counted only once. Not all universities could do so, but the available figures are shown in Table 7.

5. In order to provide an indication of enrolments accepted after the end of March, the universities were asked to estimate the number of students likely to enrol between 31 March and 30 June 1969. Enrolments after the latter date are few. Nearly 1,600 additional enrolments, i.e. after 31 March, were expected mainly by the following universities: New South Wales (624), Monash (340), Sydney (150), Australian National (111) and Queensland (107). The detailed bulletin, "Students and Degrees Conferred" to be published later, will contain figures of enrolments up to 30 June 1969.

6. In Tables 1 and 7, students are classified as full-time, part-time, and external. Prior to 1968 all students were classified into these three categories as follows:

- Full-time - students taking not less than seventy-five per cent of the amount of work prescribed, or customary, for full-time courses;
- Part-time - students taking prescribed part-time courses or taking less than seventy-five per cent of the work of full-time courses;
- External - students who are not required to attend regular lectures or classes during term at the university.

As from 1968, the basis of classification for higher degree course students differs from that used in previous years. Higher degree course students are now classified as follows:

- Full-time - students attending university during the day without any other regular occupation during that time;
- Staff - full-time university staff proceeding to a higher degree;
- Part-time - students enrolled for a higher degree but not included above.

The basis of classification for all other students (i.e. other than higher degree students) remains the same.

7. In Tables 1 and 7, higher degree "staff" students are included with part-time students. The number of full-time staff members reported by universities as undertaking higher degree courses is shown in the following table.

## HIGHER DEGREE COURSE ENROLMENTS BY FULL-TIME STAFF TO END OF MARCH 1969

8. In Tables 2 and 6, enrolments are classified according to higher degree, bachelor degree, post-graduate diploma, sub-graduate diploma, certificate and all other. The last category includes courses classified as "ad hoc" and "miscellaneous" in years prior to 1968. From 1968 the universities have excluded courses not considered to be at university standard, such as adult education, refresher and "bridge" courses.

9. In Tables 3, 5, and 6, the numbers of students commencing bachelor degree, master, Ph. D., and higher doctor courses are shown. These statistics replace those of "new" enrolments shown in issues of university statistics before 1968. While a "new" student, on the old basis, was one who was new to a particular university, the basis introduced in 1968 refers to students who start, for the first time, a bachelor degree, master, Ph. D., or higher doctor course, at any Australian university. The University of Melbourne has been unable to apply this definition in 1969 and has recorded the number of students enrolling at each level (i.e. bachelor, master, etc.) for the first time at that University.

10. In Tables 4 and 5, total enrolments for bachelor degree courses, and students commencing bachelor degree courses for the first time are set out for each course. Courses are classified according to the degrees to which they lead, except in the following cases:

- (a) At Macquarie University all bachelor degree courses lead to a Bachelor of Arts degree. Enrolments have been classified according to the school in which a student is registered.
- (b) At the Royal Military College, Duntroon students enrol in the Faculty of Military Studies for either a B.A. (Mil. St.) or B. Sc. (Mil. St.) with the latter students specialising in either engineering or applied science. Students are included under B.A. or B. Sc. courses.
- (c) Students undertaking combined degree courses e.g. Arts/Law, are, as far as possible, shown as such on separate lines in Tables 4 and 5. For Arts/Law students at the University of Sydney, this was not possible, however, and they are included with Arts students.

11. In certain faculties at most universities, a student who has qualified for a pass bachelor degree, can undertake an additional year leading to an honours degree in the same field. Students enrolled in these additional honours years are shown separately in Table 4. The statistics in Table 4 do not represent all final year honours students, since, in many faculties, a student must elect to undertake an honours course at an early stage in his studies; nor do they cover students in earlier parts of a course who may be intending to proceed to an honours degree.

12. Except as indicated above, the definitions given in the Explanatory Notes provided in "University Statistics 1967, Part I - Students and Degrees Conferred" (Ref. No. 13.7) issued on 17 May 1968 apply.

#### Staff statistics

13. Summary staff statistics are shown, for each university and branch, in Table 8 and for each university in Table 10. Table 9 provides details of "teaching and research", "research only", "technical" and other staff. Note that Tables 8 and 9 show total and filled positions, but filled positions only are given in Table 10. Full-time staff are reported as at 31 March 1969, part-time staff figures are estimates for the whole year. In the bulletin "Staff and Libraries", to be published later, full-time staff will be shown at 30 June 1969 and revised estimates of part-time staff will be given. Staff statistics have been reported essentially in accordance with the concepts and definitions used for 1967 and previous years. These definitions are given in the Explanatory Notes provided in "University Statistics 1967, Part II - Staff and Libraries" (Ref. No. 13.8), issued on 10 July 1968. Minor changes of definitions introduced in 1968, unless indicated in footnotes to the tables, have no significant effect on the comparability of 1968 and 1969 figures with those for previous years.

14. There are no university staff at the Royal Australian Naval College, Jervis Bay.

#### Finance statistics

15. Summary statistics of income and expenditure in 1968 are shown, for each university, in Table 11. Expenditures from funds not controlled by the universities - on works carried out by public works departments, and as grants for teaching hospitals in South Australia - are shown separately, together with corresponding income items. Income and expenditure exclude fees collected and spent on behalf of student unions. Detailed definitions of income and expenditure, as used in this bulletin, are contained in "University Statistics 1967 - Part 3 - Finance" (Ref. No. 13.9), issued on 5 September 1969.

NOTE. Any discrepancies between totals and sums of components in tables are due to rounding.

(b) Includes students studying for degrees at the Royal Military College and the Royal Australian Naval College, A.C.T., which are affiliated with the University of New South Wales.

(c) Includes Arts/Law.

(d) New course.

(e) New regulations were introduced in 1968 whereby a student must enrol as a Bachelor of Arts candidate for the first two academic years of the course.

(f) Many students enrolled for the Bachelor of Education course do not proceed beyond the first academic year after which they may obtain a Diploma of Education.

(g) Students can change from the law course to the jurisprudence course and vice-versa.

(h) Commerce/Law.

(i) Includes enrolments for Bachelor of Science in Architecture (a post-graduate bachelor degree course).

(j) Town planning.
